

SUSTAINABILITY POLICY

At Green Moon Events we understand our event management operations and processes impact both positively and negatively on the environment, our surrounding society and the economy.

Our purpose and mission is to support, continue and promote the development of sustainability in the event industry.

We are committed to show sustainability leadership throughout all of our event management operations and processes.

Our core principles are to engage, develop, influence, motivate and communicate. We are committed to upholding these principles and values throughout our event management operations and processes.

We strive to continually improve and develop our ways of working to leave a positive legacy.

We recognise that event management can have positive, long term social, environmental and economic impacts, and therefore sustainability is core to the foundation of all of our event management operations and processes, including our products and services.

We will ensure that this policy is communicated to all of our stakeholders and supply chain with regards to our event management operations, products, services and processes which includes the whole event lifecycle from event conception to post event review.

We will ensure we listen and record any feedback from stakeholder engagement and endeavour to find solutions to meet the needs of our end users.

At Green Moon Events we will ensure that we adhere and comply with all applicable legal and other requirements to which we subscribe:

Our objectives are:

- To engage with our stakeholders
- To consider the environmental impact of our actions
- To seek feedback from event attendees and use it to improve practice
- To ensure staff are up-to-date with sustainability policy and developments
- To grow income levels to allow sustainable growth

These objectives address our key issues of business growth and improving the positive impact of our events.

This policy is available to all staff, clients, suppliers and other interested parties and will be reviewed annually. The nominated sustainability champion for Green Moon Events is Helen Exton.
